Mirror, Mirror on the Wall, Who is the GREENEST of Them ALL

Adairsville, GA – May 20, 2008 – Everything – people, companies, products, our homes – is turning GREEN and Eagle Solutions is leading the way with earth friendly, green cleaning, propane floor maintenance equipment. Eagle introduces their new line of UHS (Ultra High Speed) propane burnishers, EnviroPro. Powered with EPA and CARB certified, low emission engines, this line can meet GS-42 and LEED requirements for green cleaning. Our goal is to go beyond those standards, though, and create the most environmentally friendly and operator safe propane burnishers in the market.

The **EnviroPro** line comes standard with:

- Dust Control System that captures dust during the burnishing process and removes it from the environment
- Emissions Monitor evaluates the engine performance and will alert the operator to abnormalities, even shutting down the engine if emissions rise
- Electric Clutch, stops the spinning pad when the handle is released
- Manufactured with recyclable raw materials

These features and more are standard on this line.

With more companies choosing green cleaning standards, floor maintenance professionals can feel confident that Eagle Solutions will provide them with the equipment and expertise to meet their needs. Being "green" also means using less labor with better, safer results. You will find that Eagle Solutions can provide you with "Better Results, Period."
